Students,

Hope you had a good weekend. Here are some announcements for this week. I will be sending a separate email about Fall Registration next. Fall Registration started yesterday. I will have one email to forward after this as well.

No more deadlines for this term, as registration for Spring Term is now complete, since last Friday was the last day to withdraw from an individual class or classes and the last day to change to S/U grading.

**Summer Term Registration:**
Summer Term registration is currently underway. You don’t need a PIN number, this will be a first-come first-served basis. If you have any questions, please let me know.

**Graduating Seniors:**
There will be a live event this year, see the link below.
https://commencement.oregonstate.edu/

**Job/Internship Posting Information:**
When conducting your job or internship search it is important to be aware of any possible misrepresentations that may exist. Therefore, we encourage you to read the following information so that you avoid any unfortunate situations. Oregon State University College of Agricultural Sciences (CAS) makes no representation, warranty or guarantee about the positions listed. CAS does not prescreen employment or internship opportunities that are submitted. By using the resources available, you are assuming full responsibility for your safety, security, wages, working conditions, fraudulent, or other aspects of any off-campus employment/internship opportunities that you discover while using CAS resources.

**Dinsdale Farm and Equipment Job Opportunity:**
Please see the attached PDF flyer for more information.

**Wallowa County Agriculture Resource Foundation Scholarship**
Attached is a copy of the Wallowa County Ag Resource Foundation Scholarship application. Note eligibility is for those students that attended school (high school or grade school) in Wallowa County. Preference is given to non-freshman.

**Common Energy - Student Internship Opportunity:**
I am emailing in regards to our Clean Energy Advocate (CEA) program. We’re a youth-centered program that offers college credit and pay for college students to advocate for community solar, a new state program that connects households to local solar farms. In turn, carbon emissions are lower, and so are the cost of utility bills. This is a great opportunity for students interested in careers in sustainability. The following link is a one-minute informational video about this program: [Introduction to Common Energy](http://www.commonenergy.us/).
Would you be comfortable sharing this opportunity with your students? I believe the students at OSU can make a positive impact on the environment and in their community by joining this team, and I would love for more students to hear about this program. I noticed that the college has a page that lists internship companies, and I think it would be great to add Common Energy to that list!

Students can apply HERE: https://apply.workable.com/common-energy-1/j/21E600E1F6/

That is all I have for now.

Have a good week.

Tjodie
